

# God's Creation

The environment has terrible flaws,  
Inconsolably, us humans are the cause.

God has made us the resilient, faithful, chosen ones,  
So we should stop fooling around with our impractical puns.

The fragile fragments of the Earth are starting to fall apart,  
Why are we treating the Earth like we have no hearts?

The sea levels are rising, and icebergs are melting,  
The coral reefs are dying, and no one is helping.

Stop putting chemicals in what we're trying to breathe  
Our future is stolen, and we are the thieves.

Giving our exquisite, beautiful, Earth, pain,  
Will never be worth it for our own gain.

Instead, let's stop the dreadful pollution,  
Together, we'll find a beneficial solution.

Please stop using wasteful plastic,  
We can use more items that are organic.

The more we recycle paper,  
The more we give trees a promising favour.

Passionately, bike to work instead of drive,  
Gracefully, It will help the fresh air thrive.

The poor, despondent animals are trembling with fear,  
The cruelty we have thrown at them doesn't have the right to be here.

I hope that the Earth won't come to a horrendous destruction,  
So that we won't live in uttermost desolation.

I hope and pray for a better tomorrow,  
Instead of a day full of despair and sorrow.

We all must act now unceasingly,  
So that the Earth will survive delightfully.

Let's all give our future generation an unfeigned chance,  
And think of a healthier conclusion in advance.

Mother Earth is a delicate and divine place to be  
So let us all help so that we can regenerate with glee.

Together, we can build a magnificent foundation,  
So that our plans will be perfect for our next generation.
