

God's creation poem

We are created to be brothers and sisters and look after nature,
although we're not doing everything he asked in favour,
we are hurting the earth as if we're breaking a heart,
but this isn't just going to be the very start.

Trees tumbling down to their knees,
crying in pain as they now have to leave,
the ice is melting causing some arctic animals near extinction,
they shouldn't have to suffer because of our reason,
oceans fighting for their lives,
to keep their clear blue colour alive,
we don't want filthy air,
let's make that clear,
marine animals sink,
to the end of their brink,
as animals wonder why they are the feast,
in the future there would be more plastic than fish in the ocean at least.

We as humans are wrong to this day,
we do these things to get everything our way,
lets all get together together as one,
let's all save God's creation to get the job done,

as God said if we follow his direction,

we will make it to our destination.

Switching plastic bags to paper bags Is the least we could do,

picking up trash is the right thing to do,

make a change by using an electric car,

that won't produce gases that would leave a scar,

leave our animals cheerful lives,

don't pollute because you can change a life,

plant a seed to grow a tree,

everything would go back to green with no guarantee.

If we make this change Earth would be as bright as a star,

the natural colours would run through earth for long and far.

the earth is slowly slipping away,

it could die right now or any day.
